this product shall be limited to the refund of the
purchase price, only. By using this product, you are
deemed to have accepted the terms of this notice.

Guaranteed by: EZ- FLO Fertilizing Systems
3640 Cincinnati Ave. ~ Rocklin, CA 95765

DIRECTIONS FOR USE

Apply HYDRO-CLEANSE when water treatment and
buffering are needed or as a cleaning agent for
bicarbonate accumulation in drip irrigation systems. Ideal
for treating high bicarbonate water without the addition of
excessive antagonistic sulfate ions. Provides a variety of
carboxylic acids that help to unlock and chelate soil
nutrients. HYDRO-CLEANSE may not be mixed with
FERTI-MAXX fertility products and should be applied
alone. When applying for drip emitter cleaning, do not let
emitter pH fall below 6.0 to prevent plant toxicity.

APPLICATION RATES / INTERVALS

BACKPACK AND TANK SPRAYERS: First, test the pH of
the spray tank solution. If current pH is too high, add 1
ounce of HYDRO-CLEANSE per 100 gallons of water.
Retest the tank spray solution for your desired pH level. If
the new pH is still too high, add another ounce of
HYDRO-CLEANSE to the spray solution. Repeat until
desired results are achieved. Do not exceed the 6 ounce
per 100 gallon maximum rate.

SHAKE WELL BEFORE USING

STORAGE INFORMATION:

Keep container tightly closed. Store in a dry,
well-ventilated, and cool location, away from direct
sunlight or where freezing is possible. Failure to
follow storage guidelines may lead to product
degradation. For Commercial Use Only.
KEEP OUT OF REACH OF CHILDREN & PETS
