DIRECTIONS FOR USE

CRITTER-MAXX repellent helps to repel those pesky "critters" that destroy or damage landscape plantings. It is not a poison that will kill animals; it simply makes the environment unpleasant. CRITTER-MAXX gives you the power to repel and limit critters that you believe are harmful to your property and your wallet. Use of CRITTER-MAXX with HYDRO-MAXX is recommended to increase penetration in hard or compacted soils. Multiple applications may be required to achieve desired results. CRITTER-MAXX may be added to any FERTI-MAXX fertility product and is optimized for use with fertigation.

APPLICATION RATES / INTERVALS

Fertigation Systems: For best results, CRITTER-MAXX should be distributed at a high initial application rate. Initial application rates are 1 gal/128 ounces per 10,000 sqft. If inadequate results are achieved, increase the usage by 64 ounces per 10,000 sqft. Subsequent applications should be at 1 pint / 16ounce per 10,000 sqft.. Repeat monthly as necessary.

Sprayers and Handheld Sprayers: Apply 1 gal/128 ounces per 10,000 sqft. initially and 16 ounces per 10,000 sqft. subsequently. All applications of CRITTER-MAXX should be applied in a minimum of 2 gallons of water per 1,000 sqft. Apply only as directed.

This product has not been registered by the United States Environmental Protection Agency. EZ-FLO Fertilizing Systems represents that this product qualifies for exemption from registration under the Federal Insecticide, Fungicide, and Rodenticide Act.

STORAGE INFORMATION:

Should be stored in a climate controlled environment between 50-90° F. Failure to follow storage guidelines may lead to crystal formation or product degradation.
