EZKIT - HIGH CAPACITY SYSTEMS

CAPACITY

The new EZKIT systems are the next generation of quality injection products offered by EZ-FLO. The EZKIT-1 and EZKIT-3 are nearly identical in construction to the time tested CX versions. However, the KITS now offer upgraded features previously only available in high capacity models.

The proprietary fill system nearly **doubles the water-soluble powder capacity** of a CX model, extending the refill duration or coverage area of a tank. The EZKIT-3 will service properties as large as 1 acre of turf or 2 acres of drip when using Ferti-Maxx Water Soluble Powders (WSP).

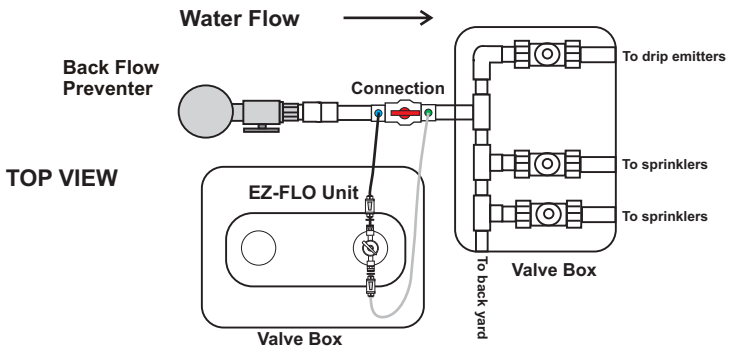

CONVENIENCE

Each model incorporates a separate fill port and drain valve allowing for the system to be refilled with product and never leave the valve box. No tubing to disconnect or heavy tank to lift out providing for a faster, simpler refill. The CBV connection for 3/4”-1” and Tubing Kit come standard in the box.

COST

With added duration between refills, less site visits are required to service a typical property or you can lower your equipment install cost. A smaller system, smaller valve box, smaller hole, all make adding EZ-FLO a budget friendly option for more clients.

TECHNICAL DATA

PART: EZKIT 1
LIQ: 1.75 gal capacity
WSP: 17.5 lbs water soluble capacity
DIMS: 14x10x11”
Valve Box: 20x16x12”
Weight: 11 lbs
CBV Connection Included

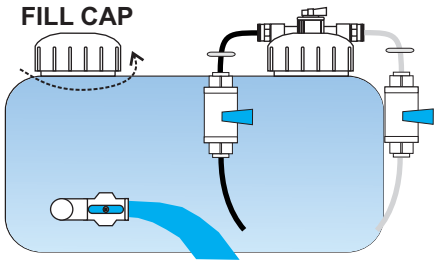

PART: EZKIT 3
LIQ: 2.5 gal capacity
WSP: 25 lbs water soluble capacity
DIMS: 22x10x11”
Valve Box: 30x18x17”
Weight: 13 lbs
CBV Connection Included

THE EZKIT ADVANTAGE

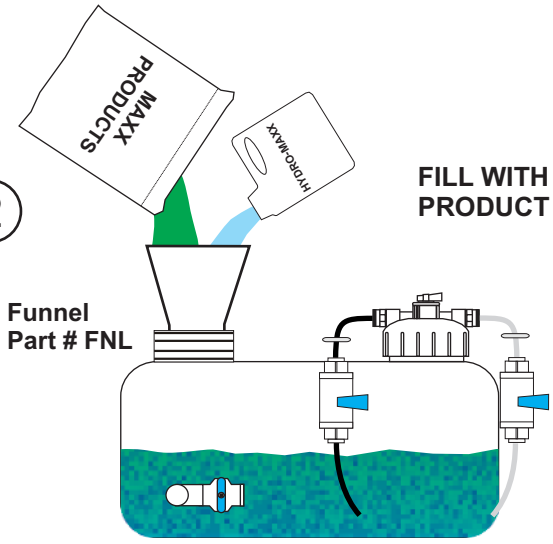

1 DRAIN WATER

OPEN DRAIN

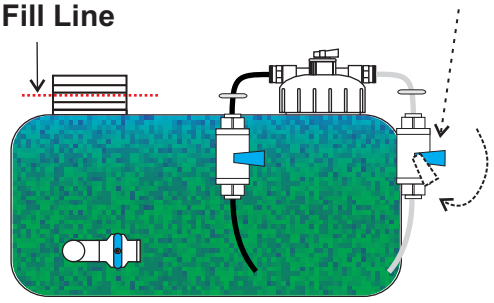

QUICK “EZ” REFILL

2 FILL WITH PRODUCT

CLOSE DRAIN

3 TOP OFF WITH WATER

4 TURN SYSTEM ON
