

## Sizing the Tank

To keep the process simple, we follow a straight forward sizing method that focuses on the irrigated area / root zone only for a 4 to 8 week refill period. This ensures you will have ample capacity for a wide range of products.

Quick Sizing: One Pound of Water Soluble Fertilizer Per 1000 SQFT of Landscape (irrigated area / root zone)

**Example:**

**75,000 SQFT Landscape** (50,000 SQFT of Turf & 25,000 SQFT of Trees & Shrubs)

**1 pound of capacity per 1,000 SQFT = 75,000 / 1,000 = 75 LBS of Capacity Needed**

**Quick Sizing Reference Chart:**

Using the chart above the EZ010-HC is ideal for this 75,000 SQFT application. Want to refill less often, the EZ017-HC will last twice as long. Smaller tanks may be used to meet budgetary requirements but may require more frequent refills.

The EZ-FLO system is simplified so even a best guess is sufficient for sizing. If you have any questions, please reach out to us for assistance.
